Mrs. Christy Nelson
Assistant Principal

We are excited to share that our robotics team, Indian Trail Middle School Robo-Hawks Team Alt-F4, won the Tennessee State Robotics Championship! This achievement is a testament to our students' dedication to engineering, teamwork, and problem-solving-skills that will drive the future of technology and innovation.

As we prepare to compete for our second consecutive year at the Vex Robotics World Championship in Dallas this May, we are seeking support from industry leaders like yourself who share our passion for STEM education. Robotics provides hands-on experience in coding, mechanical design, and critical thinking, equipping students with the skills necessary for careers in engineering and technology. Your support would help us continue our mission to inspire the next generation of innovators.

We would greatly appreciate any contribution your corporation can make toward our program. Your partnership will not only help our team but also strengthen the STEM pipeline by investing in young minds eager to tackle real-world challenges.

Thank you for your time and consideration—we look forward to the possibility of working together.

Sincerely,

Ms. Misty Davis
